Zero flow ($\mathbf{q}_h = 0$)
Active flow ($\mathbf{q}_h \neq 0$)
Ground truth $\theta_j^\dagger$
(a) Subdiffusion Order α
(b) Viscoelastic Order β
(c) Apparent Diffusivity D
(d) Effective Young's Modulus E
Zero-flow cost stays at the saved $\sim 10^{-30}$ level
Zero-flow cost stays at the saved $\sim 10^{-30}$ level
α
β
D
E
Conditional misfit J (symlog; exact zeros retained)
Linear threshold: 10^{-18}; values below it are compressed, not replaced.
