Fractional-order sensitivity of measured terminal responses
(a) Alpha Sweep ($\beta = 0.45$)
$c_h(T)$ at lesion centre
$\|c_h(T)\|_{L^2}$
Baseline $\alpha = 0.70$
Relative change from baseline [%]
Subdiffusion order $\alpha$
(b) Beta Sweep ($\alpha = 0.70$)
$\|d_h(T)\|_{L^2}$
$\|p_h(T)\|_{L^2}$
$\mathcal{D}_\beta(T)$
Baseline $\beta = 0.45$
Relative change from baseline [%]
Viscoelastic order $\beta$
